

VECTOR TRIKE®

INTELLIGENT ONLINE DATA MANAGEMENT

Vector Strike

Protect your communities with the first online, enterprise-grade Multiple Vector Control System.

RapidMap's solution ensures effective management of public health risks by centralizing critical data and coordinating it with field activities in real-time via the internet.

Its seamless integration with online and GIS maps enable visualization of your data. This provides for improved analysis of information such as sources, chemical use, and inspection records. It also creates detailed reports quickly and easily, allowing for better resource management.

How can you benefit?

- Reduce operational costs
- Simplify the collection, processing & distribution of mission critical data
- Eliminate time delays & data errors
- Enhance communications with real-time data reporting
- Improve the quality of public health services
- Review data and create reports anytime, anywhere
- Leverage our secure, web-based solution to speed up workflow
- Visualize your data in GIS and mapping systems like MS Virtual Earth, Google Earth, Google Maps, ESRI ArcGIS and ArcMAP

Try it before you buy it

RapidMap is proud to offer Vector Strike on a FREE* subscription basis for a limited time.

Participants can enjoy:
